**Q24. The official investigation of the World Trade Center destruction has concluded that the buildings collapsed as a result of the damage done by the two planes crashing into the skyscrapers. Some argue that in addition to the damage done by the two planes that there had to have been explosives detonated in the buildings in order to result in their collapse. Do you accept the official explanation of the destruction resulting from the two planes or do you believe there were also explosives detonated in the buildings that were destroyed?**
