**This New York Times Upshot/Siena College MI 08 survey was conducted September 28-October 3, 2018 by telephone calls in English to 501 likely MI 08 voters. This poll has a margin of error of  $\pm 4.8$  percentage points. Calls were made to a stratified weighted sample of voters from the L-2 Voter list via both land and cell phones. . A likely-to-vote probability was computed for each respondent based on their stated likelihood to vote as well as by virtue of the imputation of a turnout probability score based on past voting behavior. This combined probability to vote score was applied as a weight along with a weight that considered party, age, race/ethnicity, education, region within the district and gender. Polling support for this project provided by Institute for Policy and Opinion Research at Roanoke College, Reconnaissance Market Research, M. Davis & Company, The Public Opinion Research Lab at the University of North Florida and The Survey Research Center at the University of Waterloo.
