The Siena College Research Institute (SCRI) holiday survey was conducted November 14-16, 2021 by random telephone calls to 376 New York adults via landline and cell phones and 427 responses drawn from a proprietary online panel of New Yorkers. Respondent sampling via phone was initiated by asking for the youngest person in the household. The overall results has an overall margin of error of +/- 3.8 percentage points including the design effects resulting from weighting. Telephone sampling was conducted via a stratified dual frame probability sample of landline (from ASDE Survey Sampler) and cell phone (from Dynata) telephone numbers from within New York State weighted to reflect known population patterns. Data from the telephone and web samples were blended and statistically adjusted by age, race/ethnicity, gender and party to ensure representativeness. The Siena College Research Institute, directed by Donald Levy, Ph.D., conducts political, economic, social and cultural research primarily in NYS. SCRI, an independent, non-partisan research institute, subscribes to the American Association of Public Opinion Research Code of Professional Ethics and Practices. For more information, call Dr. Don Levy, Director Siena College Research Institute, at 518-783-2901. For survey cross-tabs: www.Siena.edu/SCRI/research.
