This Siena College Poll was conducted January 3 - 8, 2023, among 821 Mississippi State registered voters with 538 voters contacted through a dual frame (landline and cell phone) mode and 238 responses drawn from a proprietary online panel (Lucid) of Mississippians. Telephone calls were conducted in English and respondent sampling was initiated by asking for the youngest person in the household. Telephone sampling was conducted via a stratified dual frame sample of landline and cell phone drawn from the L-2 database of registered voters within Mississippi weighted to reflect known population patterns. Data from both collection modes (phone and web) was merged and statistically adjusted by age, race/ethnicity by Congressional District, education, region, and gender to ensure representativeness. It has an overall margin of error of +/- 4.6 percentage points including the design effects resulting from weighting. There were 487 registered voters who intend to vote in the August Republican Primary, with a margin of error of +/- 5.9 percentage points including the design effect resulting from weighting. The Siena College Research Institute, directed by Donald Levy, Ph.D., conducts political, economic, social, and cultural research primarily in NYS. SCRI, an independent, non-partisan research institute, subscribes to the American Association of Public Opinion Research Code of Professional Ethics and Practices.
