This Siena College Poll sponsored by AARP was conducted April 7 - 10, 2025, among 811 New York City Registered Voters. Of the 811 respondents, 537 were contacted through a dual frame (landline and cell phone) mode (394 completed via text to web) and 274 respondents were drawn from a proprietary online panel (Cint). Telephone calls were conducted in English and respondent sampling was initiated by asking for the youngest person in the household. Telephone sampling was conducted via a stratified dual frame probability sample of landline and cell phone telephone numbers weighted to reflect known population patterns. The telephone sample was obtained from L2. Data from collection modes was statistically adjusted by age, party, region, race/ethnicity, and gender to ensure representativeness. It has an overall margin of error of +/- 3.7 percentage points including the design effects resulting from weighting.

The Siena College Research Institute, directed by Donald Levy, Ph.D., conducts political, economic, social, and cultural research primarily in NYS. SCRI, an independent, non-partisan research institute, subscribes to the American Association of Public Opinion Research Code of Professional Ethics and Practices.
