This AARP Poll was conducted by the Siena College Research Institute April 7 - April 10, 2025, among 811 New York City registered voters. Of the 811 respondents, 537 were contacted through a dual frame (landline and cell phone) mode (394 completed via text to web) and 274 respondents were drawn from a proprietary online panel (cint). Telephone calls were conducted in English, and respondent sampling was initiated by asking for the registered voter in the household. Telephone sampling was conducted via a stratified dual frame registered voter list of landline and cell phone telephone numbers weighted to reflect known population patterns. The telephone sample was obtained from MSG using the L2 voter list. Data from collection modes was statistically adjusted by age, region, race/ethnicity, education, party, and gender to ensure representativeness. It has an overall margin of error of +/- 3.7 percentage points, including the design effects resulting from weighting. Interviews conducted online are excluded from the sample and final analysis if they fail any data quality attention check question. Duplicate responses are identified by their response ID and removed from the sample. Three questions were asked of online respondents including a honey-pot question to catch bots and two questions asks the respondent to follow explicit directions. The proprietary panel also incorporates measures that "safeguard against automated bot attacks, deduplication issues, fraudulent VPN usage, and suspicious IP addresses". Coding of open-ended responses was done by a single human coder. Data from collection modes was weighted to balance sample demographics to match estimates for New York's population using data from the Census Bureau's U.S. American Community Survey (ACS), on age, region, race/ethnicity, education and gender to ensure representativeness. The sample was also weighted to match current patterns of party registration using data from L-2. It has an overall margin of error of +/- 3.7 percentage points including the design

The Siena College Research Institute, directed by Donald Levy, Ph.D., conducts political, economic, social, and cultural research primarily in NYS. SCRI, an independent, non-partisan research institute, subscribes to the American Association of Public Opinion Research Code of Professional Ethics and Practices.
