Siena College Poll Conducted by the Siena College Research Institute March 29 - May 10, 2024 955 NYS Residents MOE +/- 3.2%

This Siena College Poll was conducted March 29 - May 10, 2024, among 955 NYS Residents drawn from a proprietary online panel (Cint). Interviews conducted online are excluded from the sample and final analysis if they fail any data quality attention check question. Duplicate responses are identified by their response ID and removed from the sample. Three questions were asked of online respondents including a honey-port question to catch bots and two questions ask the respondent to follow explicit directions. The proprietary panel also incorporates measures that "safeguard against automated bot attacks, deduplication issues, fraudulent VPN usage, and suspicious IP addresses". Coding of open-ended responses was done by a single human coder. Data from collections ask the respondent to follow explicit directions ask the respondent to follow explicit directions ask the respondent to follow explicit directions. The proprietary panel also incorporates measures that "safeguard against automated bot attacks, deduplication in owder was was proposed to open-ended responses was done by a single human coder. Data from collections ask the respondent to follow explicit directions. The proprietary panel also incorporates measures that "safeguard against automated by a single human coder. Data from collections ask the respondent to follow explicit directions. The proprietary panel also incorporates measures that "safeguard against automated again

The Siena College Research Institute, directed by Donald Levy, Ph.D., conducts political, economic, social, and cultural research primarily in NYS. SCRI, an independent, non-partisan research institute, subscribes to the American Association of Public Opinion Research Code of Professional Ethics and Practices.

For more information, call Don Levy at (518)-783-2901. For survey crosstabs: https://scri.siena.edu/.
